

# CORONAVIRUS:

## WHAT WE KNOW

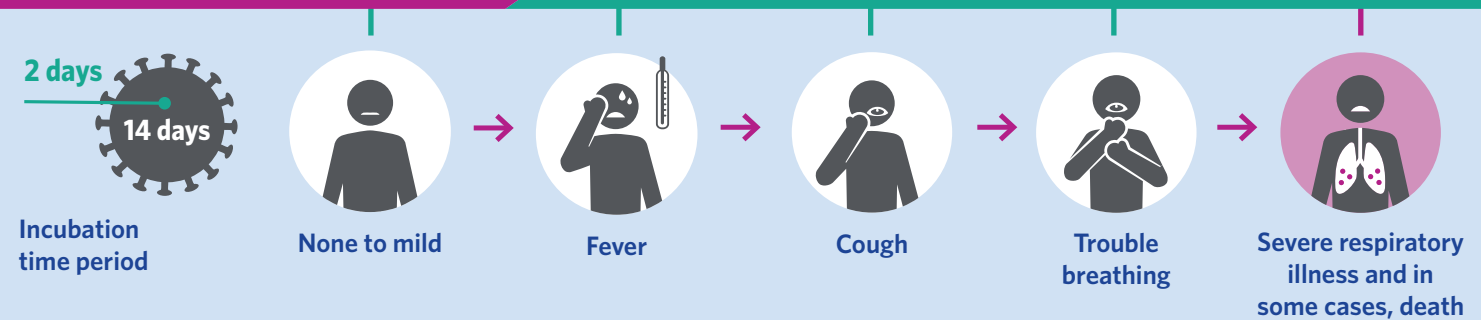

### ABOUT THE VIRUS

#### Coronavirus disease 2019 (CoVID-19)

The virus causes a mild to severe respiratory illness. How the virus spreads isn't yet fully known. It's likely spread through:

### SYMPTOMS

### PREVENTION

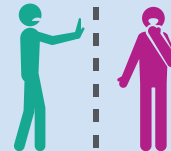

Wash your hands or use an alcohol-based hand sanitizer often.

Avoid touching your eyes, nose, and mouth.

**DON'T** have contact with people who are sick.

Clean surfaces often with disinfectant.

### WHO IS AT RISK?

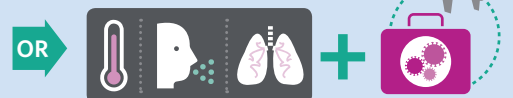

If you've been to a place where people have been sick with this novel coronavirus, you are at risk for infection.

Call your health care provider if:

You've been in close contact with a person known to have novel coronavirus and you have a fever, cough, or difficulty breathing

You have these symptoms and you live in or have recently traveled from an area with ongoing spread of novel coronavirus
